

Aditya Kadam

AI Solutions Architect · GenAI Engineer · ML Engineer

Pune, India · adityakadam.de@gmail.com · +91 88300 97489 · linkedin.com/in/adityakadam · [portfolio](#)

SUMMARY

AI Solutions Architect with 3+ years of end-to-end ownership of production GenAI and ML systems across healthcare, finance, retail, consulting, and fitness. Delivered seven enterprise platforms for Deloitte (Malaysia, India, Singapore, Australia), Unilever, Westpac, and FairPrice Singapore — frequently as the sole AI engineer. Deep expertise in LLMs, RAG, fine-tuning, agentic workflows (LangChain, LangGraph, Google ADK), and full-stack AI product delivery on Azure and GCP. Proven record of shipping systems that measurably reduce time, cost, and manual effort at scale.

EXPERIENCE

Assistant Manager, AI Solutions

Jun 2024 – Present

Deloitte TT India LLP · Pune, India · Cross-border delivery: Malaysia · India · Singapore · Australia

MyAssist — No-Code GenAI App Builder — Malaysia

[Azure OpenAI](#) · [GPT-4o](#) · [LangChain](#) · [Azure AI Search](#) · [Python](#)

- Designed and shipped a no-code GenAI platform allowing non-technical business users to configure and deploy chat assistants, document reviewers, and workflow automations through a guided UI — zero engineering tickets required.
- Compressed AI tool deployment from weeks to minutes, eliminating the engineering bottleneck entirely and enabling self-served AI workflows across the engagement.

AI Navigator — Competitor Intelligence Platform — Malaysia · India · Australia

[Gemini](#) · [Vertex AI](#) · [Vertex AI Web Search](#) · [RAG](#) · [FAISS](#) · [GCP](#) · [Python](#)

- Built an autonomous competitor intelligence engine that scrapes news, financial disclosures, and technology signals across three countries and generates structured strategic reports on demand.
- Replaced hours of manual research per analyst; cross-country signal monitoring shifted from reactive to continuous with reports generated in seconds.

IBIC — Financial & Risk Chatbot — India

[LangChain](#) · [GPT-4o](#) · [FAISS](#) · [FastAPI](#) · [Dash](#) · [BigQuery](#) · [Python](#)

- Built a financial and risk chatbot connecting to cloud drives, databases, and uploaded documents — capable of answering queries, running calculations, generating formatted reports, and auto-dispatching email briefings.
- Eliminated manual data-pulling and report-formatting cycles; analyst time redirected from document assembly to higher-value analysis.

Agentic Data Modeller — Westpac Australia — Australia

[LangChain](#) · [OpenAI](#) · [Python](#) · [Azure](#) · [Agentic AI](#)

- Engineered a self-reviewing LangChain agent that autonomously follows Westpac's internal quality checklist, identifies its own errors, iterates on outputs, and surfaces results only when compliant.
- Reduced data modelling timeline from 6 months to 4 months (33% reduction) by eliminating the human review rework cycle and making quality enforcement continuous.

HR AI — Intelligent Hiring Screener — Singapore

[Agentic AI](#) · [Vector Search](#) · [Azure OpenAI](#) · [Python](#)

- Built an agentic hiring screener that scores, ranks, and shortlists candidates automatically before human review, replacing raw applicant pools with pre-qualified shortlists.
- Dramatically reduced recruitment noise; compressed time-to-shortlist and improved candidate quality per reviewer hour.

FairPrice CX Engine — Personalisation Platform — Singapore · FairPrice Group

[Google ADK](#) · [Gemini](#) · [GCP](#) · [Vertex AI](#) · [FastAPI](#) · [BigQuery](#) · [Python](#)

- Developed a sommelier-style personalisation and experience-curation engine for one of Singapore's largest retailers — delivering curated product and event recommendations tailored to individual preferences, weather, and membership data.
- Shipped production personalisation for a mass-consumer audience on Google's latest AI infrastructure (Google ADK).

Deloitte Design — GenAI Document Automation — Enterprise

[FastAPI](#) · [React](#) · [OpenAI](#) · [FAISS](#) · [Pydantic](#) · [Python](#) · [PPTX](#) · [DOCX](#)

- Designed a governed GenAI document automation platform: users fill a structured form, upload reference documents, and select approved templates; the platform generates brand-compliant HTML section-wise, supports chat-based regeneration, and exports PPTX/DOCX deliverables.
- Compressed multi-hour manual document drafting into a controlled AI-assisted pipeline with reusable generation infrastructure (SKILL.md, DESIGN.md, tokens.css) enforcing brand consistency at scale.

Full Stack Developer — .NET & ML

Aug 2023 – Jun 2024

HCLTech · Noida, India

- Built production full-stack applications (.NET) and ML/deep-learning components for enterprise clients, owning back-end architecture, data pipelines, modelling, and deployment end-to-end.
- Delivered reliable, production-grade systems across multi-team delivery pipelines under enterprise-grade quality and deadline standards.

Data Scientist (Freelance)

Feb 2023 – Jun 2024

Independent · Remote

- Delivered end-to-end ML/DL systems across modalities: BERT + CNN + multi-head attention fusion classifier, multilingual POS tagger (ELMo + CNN), YOLO-family object detection, Falcon 7B document simplification, recommendation systems, and statistical forecasting models.
- Gave early-stage clients access to senior ML capability without a full-time hire, shipping production-quality systems from preprocessing through deployment.

Data Scientist

Jul 2023 – Jan 2024

Swasthya AI · backed by 100X.VC · Remote

- Led fine-tuning of Llama 2 on real oncology treatment data from Apollo and Manipal hospitals, building a personalised cancer companion chatbot with secure RAG-based retrieval of patient treatment history.
- Owned data mining, warehousing, DBMS workstreams, and system integration; shipped iterative updates incorporating new medical literature into the model.

Data Science Intern

Jul 2022 – Oct 2022

ResoluteAI.in · Bengaluru, India

- Built a product-wise sales forecasting model (90% accuracy) and a neural-network sugar-price prediction model (95% accuracy) for dairy inventory and pricing strategy.
- Shipped a YOLOv7-based factory-floor monitoring system for PPE compliance and behavioural surveillance.

SELECTED PROJECTS

FitVerse AI — Personal Project

[LangGraph](#) · [Azure OpenAI](#) · [Supabase](#) · [FastAPI](#) · [React](#) · [Vite](#) · [Tailwind](#) · [PostgreSQL](#)

- Personalised fitness and diet-planning platform powered by LangGraph multi-agent orchestration; 17-signal onboarding generates fully individualised workout splits and 5-meal-per-day plans adapted daily based on logged performance, recovery, and dietary adherence.
- India-first dietary intelligence (Jain, PCOS, regional cuisines), gym equipment mapping, gamified rank progression, and a PWA interface — shipped to production at V1.0.

Company Brain — Enterprise AI Intelligence Platform — Side Project

[LangGraph](#) · [FastAPI](#) · [React/Next.js](#) · [PostgreSQL](#) · [FAISS/Qdrant](#) · [OAuth 2.0](#) · [Docker](#) · [Azure/GCP](#)

- Building an AI platform that connects to enterprise data sources (Google Workspace, Microsoft Graph, Gmail, Drive, Jira, Salesforce, HubSpot, BigQuery, PostgreSQL) and deploys specialised agents to retrieve, verify, and summarise business-wide activity.
- Multi-agent LangGraph workflows generate evidence-backed C-suite briefings on demand; provider-agnostic LLM gateway (OpenAI / Claude / Gemini), RBAC, OAuth 2.0, workspace-level permissions, and audit trails for enterprise security.
- Output layer: executive dashboard, PDF/DOCX export, Slack/Teams notifications, and scheduled email summaries.

FounderLens AI — Business Validation Lab — Side Project

[LangGraph](#) · [Claude Sonnet](#) · [FastAPI](#) · [React/Vite](#) · [PostgreSQL](#) · [Supabase](#) · [Scrapling](#) · [Redis](#)

- Brutal business validation platform for founders and SMBs: analyses market, offer, pricing, lead strategy, and execution readiness using criteria-based agent scoring across uploaded documents, business data, or live web research (Scrapling).
- Multi-agent architecture (Business Autopsy, Market Lab, Offer Lab, Pricing Lab, Leads Lab, Verdict Agent, Roadmap Agent) outputs criteria verdicts, improved offers, pricing models, lead plans, and 7/30/90-day experiments — with iterative re-analysis loops.

AI Wellness Companion — Side Project

[FAISS](#) · [RAG](#) · [LLMs](#) · [FastAPI](#) · [React](#)

- AI-powered companion web app combining mental wellness support, self-improvement coaching, habit execution, and book-grounded guidance — using a FAISS knowledge system over curated self-help, psychology, and philosophy books for wisdom-backed, personalised guidance.

Code Modularisation & Shared Repository — Internal Tool

[Python](#) · [JavaScript](#) · [Node.js](#) · [React](#) · [GitHub](#) · [Alembic](#) · [Vite](#)

- Built a centralised plug-and-play module repository across all AI engagements, reducing personal development time by 40% through reusable components, standardised patterns, and shared generation infrastructure.

SKILLS

GenAI & LLMs	LLMs, RAG, Fine-Tuning (LoRA/QLoRA), Agentic AI, Prompt Engineering, LangChain, LangGraph, Google ADK, GPT-4o, Gemini, Llama 2/3, Falcon, Claude, Multi-Agent Systems
ML & Data Science	Deep Learning, NLP, Statistical Analysis, BERT, ELMo, YOLO, TensorFlow, SMOTE, Feature Engineering, Recommendation Systems, Time-Series Forecasting
Cloud & Infra	Azure OpenAI, Azure AI Search, GCP, Vertex AI, BigQuery, FAISS, Qdrant, Supabase, PostgreSQL, Docker, Redis, Kubernetes (familiar), MLOps
Engineering	Python, FastAPI, React, Next.js, Node.js, Vite, .NET, Dash, Alembic, SQL, GitHub, Pydantic, REST APIs, WebSockets, Server-Sent Events
Delivery	End-to-end AI product ownership, client-facing delivery across 4 countries, cross-cultural collaboration, agile execution, technical mentoring

EDUCATION

Executive MBA, International Business Symbiosis International University	Jan 2026 – Feb 2028
B.Tech, Computer Science Engineering — Specialisation in Data Analytics Vellore Institute of Technology	Jun 2019 – May 2023
